

Paired Terminal Blocks

These are passive units that facilitate the interconnection of low voltage circuits. They are rated at 20A max per channel. There are 2 variants: a 120mm 10-way model and a 50mm 4-way version. They are designed to simplify wiring installations and to improve safety and security.

Variants

Base Colours :	White, Green
Length :	50mm, 120mm
Rating :	20A
Connections :	Screw

Product Information

Size WxH :	50mm x 43mm (L = 50, 120mm)
Weight 50/120	40gm/225gm
Composition :	Plastic & Steel
Made In :	United Kingdom
Software :	None
Packed Weight :	+90gm for P&P
Warranty :	10 years
Made By :	Smart Boat Ltd

Versatile SmartWiring Solution – Facilitates low-voltage circuit interconnection (12V, 24V, 48V) with 20A max per channel. Available in 4-way (50mm) and 10-way (120mm) versions, ideal for boats, RVs, trucks, solar, and industrial use. Red & Black Fork Link Bars

Simplified Installation & Flexible Mounting – Easily mount on DIN rails or flat surfaces using the included stainless steel fixing screws & fork link bars ensure a secure and adaptable setup.

Enhanced Safety & Protection – Removable clip-on cover prevents short circuits and protects against dust and debris. Stainless steel fasteners & vibration-resistant terminals ensure corrosion resistance and long-term durability.

Clear Identification & Organized Wiring – Includes preprinted labels with 96 circuit names plus base labels for module identification (e.g., +12V, Bilge Pump), making servicing and repairs faster and easier.

Eco-Friendly & Built to Last – Sustainable biomass base minimizes environmental impact, while stainless steel fasteners and reinforced terminals provide maximum reliability in harsh conditions.

Shipping & Import Terms (INCOTERMS DAP) – Shipped on a DAP (Delivered at Place) basis, meaning the seller delivers to the buyer's address, while the buyer is responsible for any import duties, taxes, and customs clearance fees.
